

Dear Reader,

Happy 2013!

We are very excited to share with you the most recent addition to our M-LINX™ solution lineup.

Our M-LINX™ suite is now BlackBerry 10 friendly!

Packaging innovative technology solutions that deliver the best overall customer user experience requires collaboration with partners that share the same vision and experience.

RIM's Early Adopter Program (EAP), extended to select Alliance Program partners, allowed MCC to quickly and reliably complete the steps necessary to ensure application security, device management and the overall user experience is second to none.

Mobile Computing Corp CEO, Camille Peters spoke with RIM about the overall EAP experience as well as some of the exciting features our customers will be able to take advantage of on this new platform.

Key area of customer benefit include:

- Positive device upgrade experience
- Intuitive & secure BYOD supported using BlackBerry Balance™
- Flexibility of BlackBerry® Enterprise Service 10
- Device characteristics and responsiveness

MCC is honored to have been invited by RIM to participate in their Early Adopter Program.

Our M-LINX™ solution on the BB10 platform is now ready for service!

As always, I welcome all questions, comments and the opportunity to discuss how we can help streamline your service or rental operations.

Sincerely,

Mike
