I am extremely excited to share with you a new product offering MCC has recently launched that will provide you with additional flexibility when it comes to your Mobile Worker tool -set!

M-LINX Mobile Worker for Tablet has arrived!

Mobile Computing Corp Inc understands that Mobile Workforce Automation requires significantly more than simply providing devices and software.

MCC realizes that each service operation is unique, and range from subtle to significant differences...why should devices be any different?

MCC has added Laptop and Tablet computers to the extensive line of supported mobile devices AND new operating systems. Supported OS now include Windows 7, Windows XP, Windows Mobile Family, Android, iOS and BlackBerry PlayBook OS. This expansion opens the door to endless possibilities for our clients.

Organizations now have the option of running a mixed-technology fleet that address dynamic user groups based on skill, environment or area of responsibility. A technician servicing rooftop HVAC units in the Canadian winter will continue to need a device suitably appointed while a project manager requiring instant access to on-line schematics and drawings will require a unit with a larger screen format.

Either way, MCC will provide you with the right solution that leverages new technologies, allowing you to take full advantage of the operational benefits and in turn continuing to drive customer satisfaction.

As always, I welcome all questions, comments and the opportunity to discuss how MCC can help transform your operations.

Sincerely,

Mike
