

Empowering the Mobile World with
M-LINX™

Anytime. Anywhere. Any Device.

Get Control! MCC is a leading full service provider of real-time Chain of Custody solutions..

Our solutions are focused exclusively on rapidly reducing your tracking and operating costs.

A mobile device will replace your paper based forms, mirroring the familiar fields your Route Personnel have come to rely on. These eForms will allow the operations to collect vital real-time tracking data as it occurs in the field. Errors are virtually eliminated!

M-LINX™ for Chain of Custody (COC) Asset Tracking

Mobile Computing Corp. Inc's. (MCC) core application is built on the M-LINX™ platform. M-LINX™ is a completely modular suite of products that can be implemented as your operation requires, and configured to align with your specific business process.

Some of the modules M-LINX™ offers to provide you with standardized CONTROL for your operations:

M-LINX™ for Mobile Chain of Custody

- Paperless delivery, adjustments, signature collection and error free calculations
- Barcode scanning to enable pickup, delivery and accurate update for every point in between
- Electronic delivery manifest via email

M-LINX™ for Customer Resource Management (CRM)

- Enter and manage customer contracts and delivery schedules
- Wireless dispatch and scheduling
- Set up invoicing and billing routines

M-LINX™ for GPS Tracking and Breadcrumb

- Vehicle, asset and operator tracking with breadcrumb playback

M-LINX™ for Routing and Scheduling Optimization

- Dynamically optimize your route based on predefined business variables and/or emergency situations

M-LINX™ Business Intelligence Reporting

- Unlock the answers that lie within your data to make operational and tactical decisions allowing you to differentiate against your competition

Contact our sales team to learn what other modules are available or how we can configure a solution for your operations.
