

Empowering the Mobile World with
M-LINX™

Anytime. Anywhere. Any Device.

Get Control! MCC is a leading full service provider of real-time Route Delivery and Optimization solutions for the Linen, Textile and Uniform Rental Industry.

Our solutions are focused exclusively on rapidly reducing your cost of linen management.

A mobile device will replace your paper based forms, mirroring the familiar fields your Route Personnel have come to rely on. These eForms will allow the operations to collect vital real-time data as it occurs in the field. Errors are virtually eliminated!

M-LINX™ for Linen and Textile Rental Services

Mobile Computing Corp. Inc's. (MCC) core application is built on the M-LINX™ platform. M-LINX™ is a completely modular suite of products that can be implemented as your operation requires, and configured to align with your specific business process.

Some of the modules M-LINX™ offers to provide you with standardized CONTROL for your operations:

M-LINX™ for Mobile Route Delivery

- Paperless delivery, adjustments, signature collection and error free calculations
- Electronic invoices emailed upon settlement
- Operator tracking (GPS with breadcrumbs)
- Electronic dispatch with real time web portal dashboard
- Simplified end of day settlement for both driver and admin

M-LINX™ for Garment Order and Wearer Quit

- Add, edit, remove, clone a wearer and identify required mends or repairs
- Account and track all garments throughout the rental and quit return process

M-LINX™ for Production Load

- At a glance centralized production status dashboard, with electronic work orders simplify the pack out process
- Shortages and errors and automatically identified

M-LINX™ for Electronic Soil Tickets

- Eliminate pre-printed soil tickets
- Scan and assign tickets to customer bags as required; data integrates with 3rd party soil counting software

M-LINX™ for Routing and Scheduling Optimization

- Dynamically optimize your route based on predefined business variables and/or emergency situations

M-LINX™ for Medical Waste Chain of Custody Tracking

- Electronically support process, pickup, weight, and account for all containers from point of pickup to the autoclave facility

M-LINX™ Business Intelligence Reporting

- Unlock the answers that lie within your data to make operational and tactical decisions allowing you to differentiate against your competition

Contact our sales team to learn what other modules are available or how we can configure a solution for your operations.
